SYDNEY ENGINEERING EXCELLENCE AWARDS 2014

The Sydney Engineering Excellence Awards (SEEA) are the preeminent program that recognises the contribution engineers make to community through their innovations, teamwork, ingenuity and creativity.

The award program provides an opportunity to encourage excellence through the identification and promotion, both within the profession and the community at large, for outstanding achievements in the advancement of the science and practice of engineering.

Enter online at:

www.engineersaustralia.org.au/sydeea

WHY ENTER THE AWARDS?

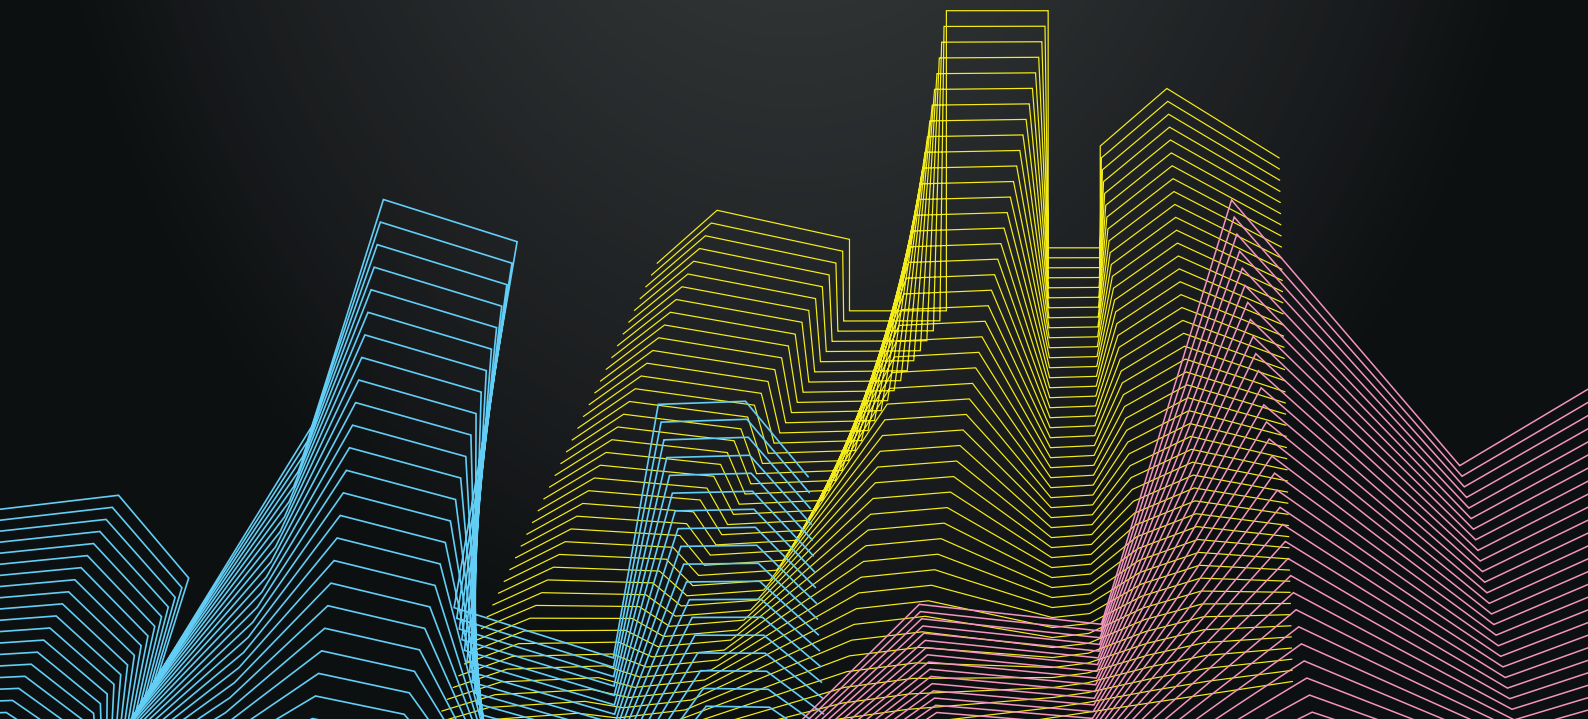

RECOGNITION: Receive industry wide recognition for the quality of your work by being named an award winner. Be recognised in monthly e-newsletters, magazines, newspapers and online.

CREDIBILITY: Bolster your credibility amongst your peers, clients and prospects via the announcement of your win in important and targeted media. Winners use the SEEA 2014 "winners" logo on corporate material. There are also opportunities to display projects at the Powerhouse Museum.

WIN MORE WORK: As an award-winning company, you have another reason that puts you ahead of the rest when pitching for work.

INTERNAL MORALE: Become an employer of choice and boost internal team morale; celebrate your wins and achievements by celebrating the team who made it possible.

LEADER POSITION: Amongst a competitive environment, positioning yourself as a leader in your field by claiming the rights to being the best can make all the difference.

- Control Systems and Communications
- Software and Embedded Systems
- Products, Manufacturing Facilities and Processes
- Environment and Heritage
- Welfare, Health and Safety
- Innovations and Inventions
- Research and Development
- Project Management
- Infrastructure Projects
- Building and Structures
- Small Business Ventures
- Engineering Reports
- Engineering for Regional Communities

"Participating in and winning an Australian Engineering Excellence Award has been very rewarding. All team members have felt a surge of pride in the high profile recognition of the value of their work, and it has provided publicity that has lead to numerous commercial contacts that would not otherwise have occurred."

Mark Hedley, Project Leader -
Wireless Tracking, CSIRO

2013 President's Award winner for the project: Tracking elite athletes with revolutionary ClearSky technology by CSIRO with joint entrant Catapult Sports

Specific eligibility for each award category is available at:
